MSP is an integrator company that integrates communication technology for monitoring and asset management.

MSP builds and develops software & hardware to connect embedded instruments with communication devices that use Internet, GPRS and Satellite communication technologies that can be used in various sectors and industries

VESSEL MONITORING SYSTEM

Multipurposed asset tracking / monitoring tool. Easy to install, easy to integrated. The integration is fully programmable requested by user's, comprehensive and full feature. With a wide coverage data communication network, it is ideal for use in maritime industries for monitoring, as well as other industries

Specification

Satellite Communication

- Satellite service: two-way, Global, IsatData Pro
- Frequency: Rx: 1518.0 to 1559.0 MHz; Tx: 1626.5 to 1660.5 MHz; 1668.0 to 1675.0 MH
- GPS/Glonass/Beidou/Galileo • Acquisition time: Hot: 1 second; Cold: 29/30/36/29 seconds • Accuracy: 2.0m CEP

Main Box Controller 12-24 Volt

- Battery Backup 2x24 hours
- Emergency Button

Environmental

- Operating temperature: -40°C to +85°C
- Dust and water ingress: IP67
- Vibration: SAE J1455 (Sec 4.9.4.2 fig 6-8); MIL-STD-810G (Sec 514.6)
- Shock: MIL-STD-810G (Sec 516.6)

RPM Sensor

- Stainless steel M12 threaded barrel
- Electronic protection against severe and automotive environments
- Unaffected by harsh environments
- IP67 rated

Our Features

Real Time Data Tracking

Engine Data Monitoring

Historical Data Tracking

Create Route Trip

24/7 Support
